

Alden Products is seeking talented engineers to fill 78 open positions.

Our new PL-1200 series connector system offers 78 positions in one compact package. You may want to add some more features to your device...

Alden's PL-1200 series connectors pack the potential of 78 contact positions and the punch of our patented Pulse-Lok® auto-latch technology into a 1.15" diameter housing. A single PL-1200 unifies multiple connections, letting you design more features into less space, keeping panel designs beautifully clean and cable management simple. Sterilizable, IP-67 sealed, and chemical resistant, the PL-1200 delivers unparalleled ruggedness. Like all Pulse-Lok® connectors, PL-1200 offers auto-latch mating with audible and tactile feedback confirming a secure connection – ideal for blind mating. And with seven standard housing colors, exclusive keying, and disposable connector options, the PL-1200 is as customizable as it is capable. If you're looking to make a move for better benefits and a positive working environment, join the Alden team. No resume required.

Configure any Alden Pulse-Lok® connector and request a sample, price quote or CAD file between now and March 31st, you'll be entered to win 1 of 3 Apple® iPod® nanos! (see complete rules online)

Interested applicants can learn more about PL-1200 connectors and enter to win at www.aldenproducts.com/PL12 or by calling us at (888)701-4880
