The Alden Pulse-Lok™ Family of Auto-Coupling Connectors is a Life Saver

In your world, connection failure is not an option. That's why designing in an Alden PL Series, plastic or metal shell connector makes smart sense.

These remarkable connectors feature Alden's signature Pulse-Lok™, auto-coupling technology, making mating as simple as push and click – confirmation that the connector pair is securely engaged. What's more, the Pulse-Lok is available in four shell sizes and a range of contact configurations up to 52 poles. The Pulse-Lok is suitable for a broad range of medical applications including therapy and monitoring – from rugged and

reusable to low cost disposable, there is a PL Series connector package for your medical device.

Alden also offers the Pulse-Lok as a complete, overmolded cable assembly custom tuned to the mechanical and environmental demands of your specific application. With Alden's in-house design, development, and performance validation capabilities, getting you to market rapidly is never an issue.

To receive complete technical specifications and a **FREE PL-700 sample**, simply go to www.aldenproducts.com/med or call (508) 427-7000.

Pulse-Lok's unique auto-latch & quick release system provides audible, visual, & tactile connection confirmation assuring successful mating in critical medical environments.
