

Somewhere Between Medical and Miracle

There's Pulse-Lok®

Reusable. Disposable. Dependable. Affordable. Absolutely indispensable.

Alden Pulse-Lok® connectors are designed for quick and intuitive mating that is so essential to critical medical applications. Every PL Series plastic or metal shell connector features Alden's signature Pulse-Lok auto-latch/quick-release mating action that provides audible, visual, and tactile confirmation that the connector pair is securely engaged. What's more, the Pulse-Lok is available in four shell sizes and a range of contact configurations up to 52 poles making it a smart choice for a broad range of medical applications including therapy and monitoring. Alden also

offers the Pulse-Lok as a complete overmolded cable assembly custom tuned to the mechanical

and environmental demands of your specific application. And with Alden's in-house design, development, and performance validation capabilities, getting you to market rapidly is never an issue. From rugged and reusable to low cost disposable, there's a PL Series connector package for your medical device that is nothing short of, well, miraculous.

To receive complete technical specifications and a **FREE Pulse-Lok® Series sample**, simply go to: www.aldenproducts.com/mm or call (508)427-7000.

Pulse-Lok's unique auto-latch / quick-release coupling mechanism provides audible, visual, and tactile confirmation that mating connectors are fully engaged – a critical feature for emergency medical applications.
